

The background of the cover is a deep blue. In the center, a stylized globe is depicted with a stippled texture, showing the outlines of continents. Three tall, lattice-structured radio towers are positioned around the globe. Thin lines representing radio waves or signal paths connect the towers to the globe. Above the towers, three horizontal banners are draped across the top. The first banner is white with orange text, the second is grey with orange text, and the third is white with orange text. The banners are held up by stylized, flame-like shapes. The overall design is a mid-20th-century graphic style.

Lyrec

High Quality Recording Equipment

↑ Illustration shows a Transcription Turntable, Model DL27, equipped with high-grade moving-coil pick-ups, lowering device, optical groove-indicators and pre-amplifiers.

Recording Turntable Model SV2, equipped with heavy duty synchronous motor, accurately machined turntable and cutter guide mechanism and with a high-grade cutting head, having a level frequency-response 30-10000 c/s. →

The *LYREC* Recording and Transcription Equipments are designed for broadcast stations, motion-picture studios, large transcription manufacturers etc.

The robust construction of the apparatus and its high technical standard entitles it to be used wherever quality is a requisite, and further the price is most reasonable.

Besides Recording and Transcription Turntables we deliver Cutting Heads, Amplifiers and other accessories.

For listeners in Europe

On 31.51 m — 9.520 kc/s

Daily 17.40—22.30. GMT. same programme as Copenhagen-Kalundborg

Listeners all over the world are invited to send reception reports together
with their criticisms and programme suggestions to

the **SHORT-WAVE DEPARTMENT, RADIO HOUSE,**
COPENHAGEN V., DENMARK

Answer by letter or QSL card

PREFACE TO FOURTH EDITION

During my work I have frequently heard the view expressed that it must be a hopeless task to furnish at the same time both a detailed and practical picture of world radio and its development year by year. I venture to hope that this fourth edition of World Radio Handbook proves that the task can be accomplished, even though it may not yet have been accomplished to perfection.

Developments have necessarily entailed an almost complete renewal of the contents of the third edition and a considerable extension of the material. It has been encouraging for me to observe an ever-increasing appreciation by the different radio organisations and stations of the value of World Radio Handbook, not only for contact between stations and listeners and between radio stations themselves, but also as a means to promote cultural understanding amongst the countries of the world.

It is my hope that in the coming year World Radio Handbook will further develop and extend cooperation between the different radio organisations and stations on the one hand and listeners' associations and the thousands of individual listeners the world over on the other.

It is of great value for the work of World Radio Handbook to receive criticism and wishes from both radio stations and listeners, and I therefore beg everyone who has any ideas or suggestions to offer to make his contribution towards improving the contents, and thus share in perfecting World Radio Handbook. I thank the many radio corporations, stations, listeners' associations and listeners who have come forward to participate in cooperation. This, I trust, will continue and develop further for our mutual benefit.

I am gratified that an opportunity is afforded me in this edition to publish a message from UNESCO, and thus extend the service given world broadcasting by World Radio Handbook.

I have to express thanks to UNO, UNESCO, the international radio organisations: l'Union Internationale de Radiodiffusion (U. I. R.), Geneva, and Organisation Internationale de Radiodiffusion (O. I. R.), Brussels, Danish representatives abroad and The Danish Society for their kind cooperation and interest.

O. Lund Johansen.

Attention is drawn to changes in the order of the sections of the book. The index of contents is to be found on page 111, and the time differences between the several countries' local time and Greenwich Mean Time are assembled in a table on page 110.

DENMARK'S LEADING PAPER

A Message from

UNESCO

"Since wars begin in the minds of men, it is in the minds of men that the defences of peace must be constructed."

It is this phrase, inscribed in UNESCO Constitution, which is the touchstone, the directive of the UNESCO Radio Unit, whose programmes are heard all round the world, though it does not actual transmitting. No broadcasting organization has ever had a more challenging task, or a more complex one. The idea that war begins in the minds of men, and that peace must be built in the minds of men is certainly not a new one, but for the first time Radio, the swiftest and most direct form of communication, is being used on a world-wide scale toward this great end.

With the guidance of radio experts from various member countries who meet at UNESCO House in Paris several times a year, the Radio Unit works on three distinct lines. It originates and distributes programme material, which serves to further the ideals of UNESCO and builds and distributes programmes suggested by the member states which might serve those same ends.

The first type of activity — the preparation of original programme material — consists of the circulation of complete recorded programmes and of scripts, which are designed so that they may be used in their entirety or may be cut or adapted to fit the particular needs of any local station.

The recordings are usually taken from an original inscribed on magnetophone and dubbed on to discs in the studio in UNESCO House. They are sent air freight to the various organizations that might be able to use the particular programme.

Some of these recordings are literally dispatched all over the world. When the Director-General of UNESCO, Dr. Jaime Torres-Bodet, is scheduled to make an important speech, sometimes thousands of miles from Paris, he often pre-records his address at headquarters in English, French and Spanish. Copies are sent out by air, so that listeners in any part of the globe may hear the speech at the same time Dr. Torres-Bodet delivers it himself.

A rich source of material is found in the many prominent personalities who visit UNESCO House. They might be interviewed, take part in round-table discussions, or make short talks on their special field of particular interest. They are often prominent scientists, statesmen, figures in the arts, or ordinary citizens whose support is vital to any international endeavour. For example, the Burmese Minister to France, M.S. Mya Sein, broadcast his impressions of UNESCO's work to his country, while listeners in the United States were able to hear a similar talk by the film star, Miss Myrna Loy, member of the Southern California Council for UNESCO.

Since January 1st 1949, UNESCO Radio has recorded over one hundred and eighty different programmes. Over four hundred and fifty sets of these programmes were dispatched on approximately a thousand discs, all of them prepared in the small studio at UNESCO House.

The recordings were made in the following 17 languages: *Burmese, Czech, Danish, Dutch, English, Finnish, French, German, Greek, Italian, Japanese, Persian, Polish, Portuguese, Russian, Spanish, Swedish.*

A mobile recording unit has been put into service at UNESCO and has already been used to gather on-the-spot material in the Voluntary International Work Camps in Belgium and Central France. The unit is often borrowed by representatives of national broadcasting services.

Almost five thousand copies of special scripts have been circulated throughout the world by UNESCO Radio. Some of these were talks by qualified experts, who work directly with the organization, or again by visitors to the Paris headquarters. They range from an analysis of "Social Tensions" to a series on "Music and Folklore", which was accompanied by recordings of the music discussed.

The "UNESCO WORLD REVIEW" is a weekly fifteen minute script, which is used in some form in thirty-eight countries and territories. It consists of a five-minute round-up of brief items covering developments in education, science and culture, and two five-minute talks by specialists in fields which fall within the range of UNESCO's interest. It includes a special series on "Food and People" prepared in co-operation with the FAO, a series on "Fundamental Education", and single talks on such divers topics as "Comic Strips" and "Radio-active Cobalt".

The Radio Unit also co-operates with other sections of UNESCO's Department of Mass Communications in encouraging the exchange of information between the broadcasters themselves, such as the data contained in the "World Radio Handbook".

As this volume goes to press, material supplied by the UNESCO Radio Unit has been used in fifty-two countries and territories. Interested broadcasters who have not yet availed themselves of its services should communicate with UNESCO in Paris.

THIS IS LA VOIX DU **Canada**

Programs from Canada are beamed daily to Europe in English, French, Dutch, Czech, Slovak, German, Danish, Norwegian, Swedish and Italian, to the Caribbean and South America in English, Spanish, Portuguese, French and Dutch, and every Sunday in English to the Southwest Pacific.

Listeners in all countries are invited to tune in to Canada's International Service for a day-to-day chronicle of Canadian life and to write requesting a monthly program bulletin.

C B C INTERNATIONAL SERVICE

Post Office Box 7,000 . Montreal . Canada

For frequencies on which CBC International Service may be heard see page 76.

INTRODUCTION

The practical information given in the following section concerning broadcasting in each individual country includes:

The difference in time between normal clock time in the country in question and Greenwich Mean Time and whether the country in question has introduced summer time. *All times listed in the surveys are Greenwich Mean Time (G. M. T.).* Page 110 you will find a *Time-table*, which gives the time difference between *your* time and *Greenwich Mean Time* enabling you to fix the right time to listen to the different stations.

The address of the broadcasting companies in question.

The names and titles of the leading personalities in each company.

The stations belonging to the company in question, giving their call-signs for short wave stations, frequencies, and corresponding wavelengths, together with the power expressed in kilowatts. For Europe, North Africa and the Near East all broadcasting stations are shown, and for other countries all short wave broadcasting stations.

Each short wave station has its own identification call-sign consisting of 3—5 letters or combinations of letters and figures, of which the first, or the two first, show the nationality. Some short wave stations, for example, the American, employ the identification call signs when announcing.

Long and medium wave stations are divided into *Main stations*, which are so powerful that they can generally be heard in the whole area of the country in question, and from which most of the broadcasting emanates, *Regional stations*, which can be heard within a certain area of the country in question, and whose broadcasts consist partly of retransmissions of the programmes of the main stations and partly their own programmes, and finally *Relay stations*, which solely retransmit the programmes of main stations. The relay stations are the weakest, and are local stations which can only be heard within a small area.

Most of the short wave stations use dirigible antennæ, that is to say, broadcasts are directed towards particular areas, and these are therefore termed the various services: European service, Near Eastern, Middle Eastern, Far Eastern, Pacific, Latin-American, Caribbean service etc. The language and the frequency employed vary in accordance with the area to which the broadcast is directed.

Daily Programmes. Under this heading will be found information concerning the total broadcasting hours, *expressed in Greenwich Mean Time*, of the different frequencies employed during broadcasting hours, and a survey of the day's broadcasting.

Frequency and wavelength.

Frequency and wavelength are divided into following groups:

Long waves with frequencies from 133 kc/s (1961 metres) to 500 kc/s (600 metres).

Medium waves with frequencies from 500 kc/s (600 metres) to 3000 kc/s (100 metres).

Short waves with frequencies from 3000 kc/s (100 metres) to 30000 kc/s (10 metres).

Megacycles, kilocycles, metres are three different terms for the wave length. 1 megacycle is equal to 1000 kilocycles. Megacycles are changed to kilocycles by multiplying megacycles by 1000. Kilocycles are changed to megacycles by dividing by 1000. Kilocycles are changed to metres by dividing kilocycles into 300000. Metres are changed to kilocycles by dividing metres into 300000. Metres are changed to megacycles by dividing metres into 300. — Kc/s means kilocycles per second = 1000 oscillations per second.

Short waves are divided into the following metre bands (m. b.):

49 metre band — 41 metre band — 31 metre band — 25 metre band — 19 metre band — 16 metre band — 13 metre band and 11 metre band.

Many short wave stations lie outside these bands. The 60 and 80 metre bands are used for local broadcasting, i. e. for reception over relatively short distances like, for example, South and Central American stations and stations in Central Africa.

In order at all times to obtain the best possible reception of shortwave broadcasts, stations change the frequency used at different times of the day and night; the season of the year is also a factor when settling the size of a frequency.

How to tune in to your favourite shortwave station.

Practice is required to adjust the receiver correctly to a shortwave station. A movement of only a hair's breadth may give the correct adjustment. When a shortwave station is found it must be finely adjusted by gently turning the scale button backwards and forwards, whilst at the same time screwing up the volume control so much that the station in question can be identified. If the scale button is turned too quickly a weak station may be missed.

Reception conditions for shortwaves can be very capricious. After listening to a far-distant station for a short time it can disappear entirely (fades), and does not come again immediately.

The same broadcast is often sent simultaneously on several wavelengths. Should you have adjusted the receiver to the station to which you want to listen and reception is unsatisfactory, try the other wavelengths used by the station during the period in question.

How to identify a shortwave station.

Should you chance to hit upon a station which you want to listen to and identify, do as follows: Read the approximate frequency, which is given in megacycles, kilocycles or metres. Look in the frequency table for the stations lying in the vicinity of the frequency. When you have limited the station to one or two possibilities and observed the programme and language, check these against the programme surveys.

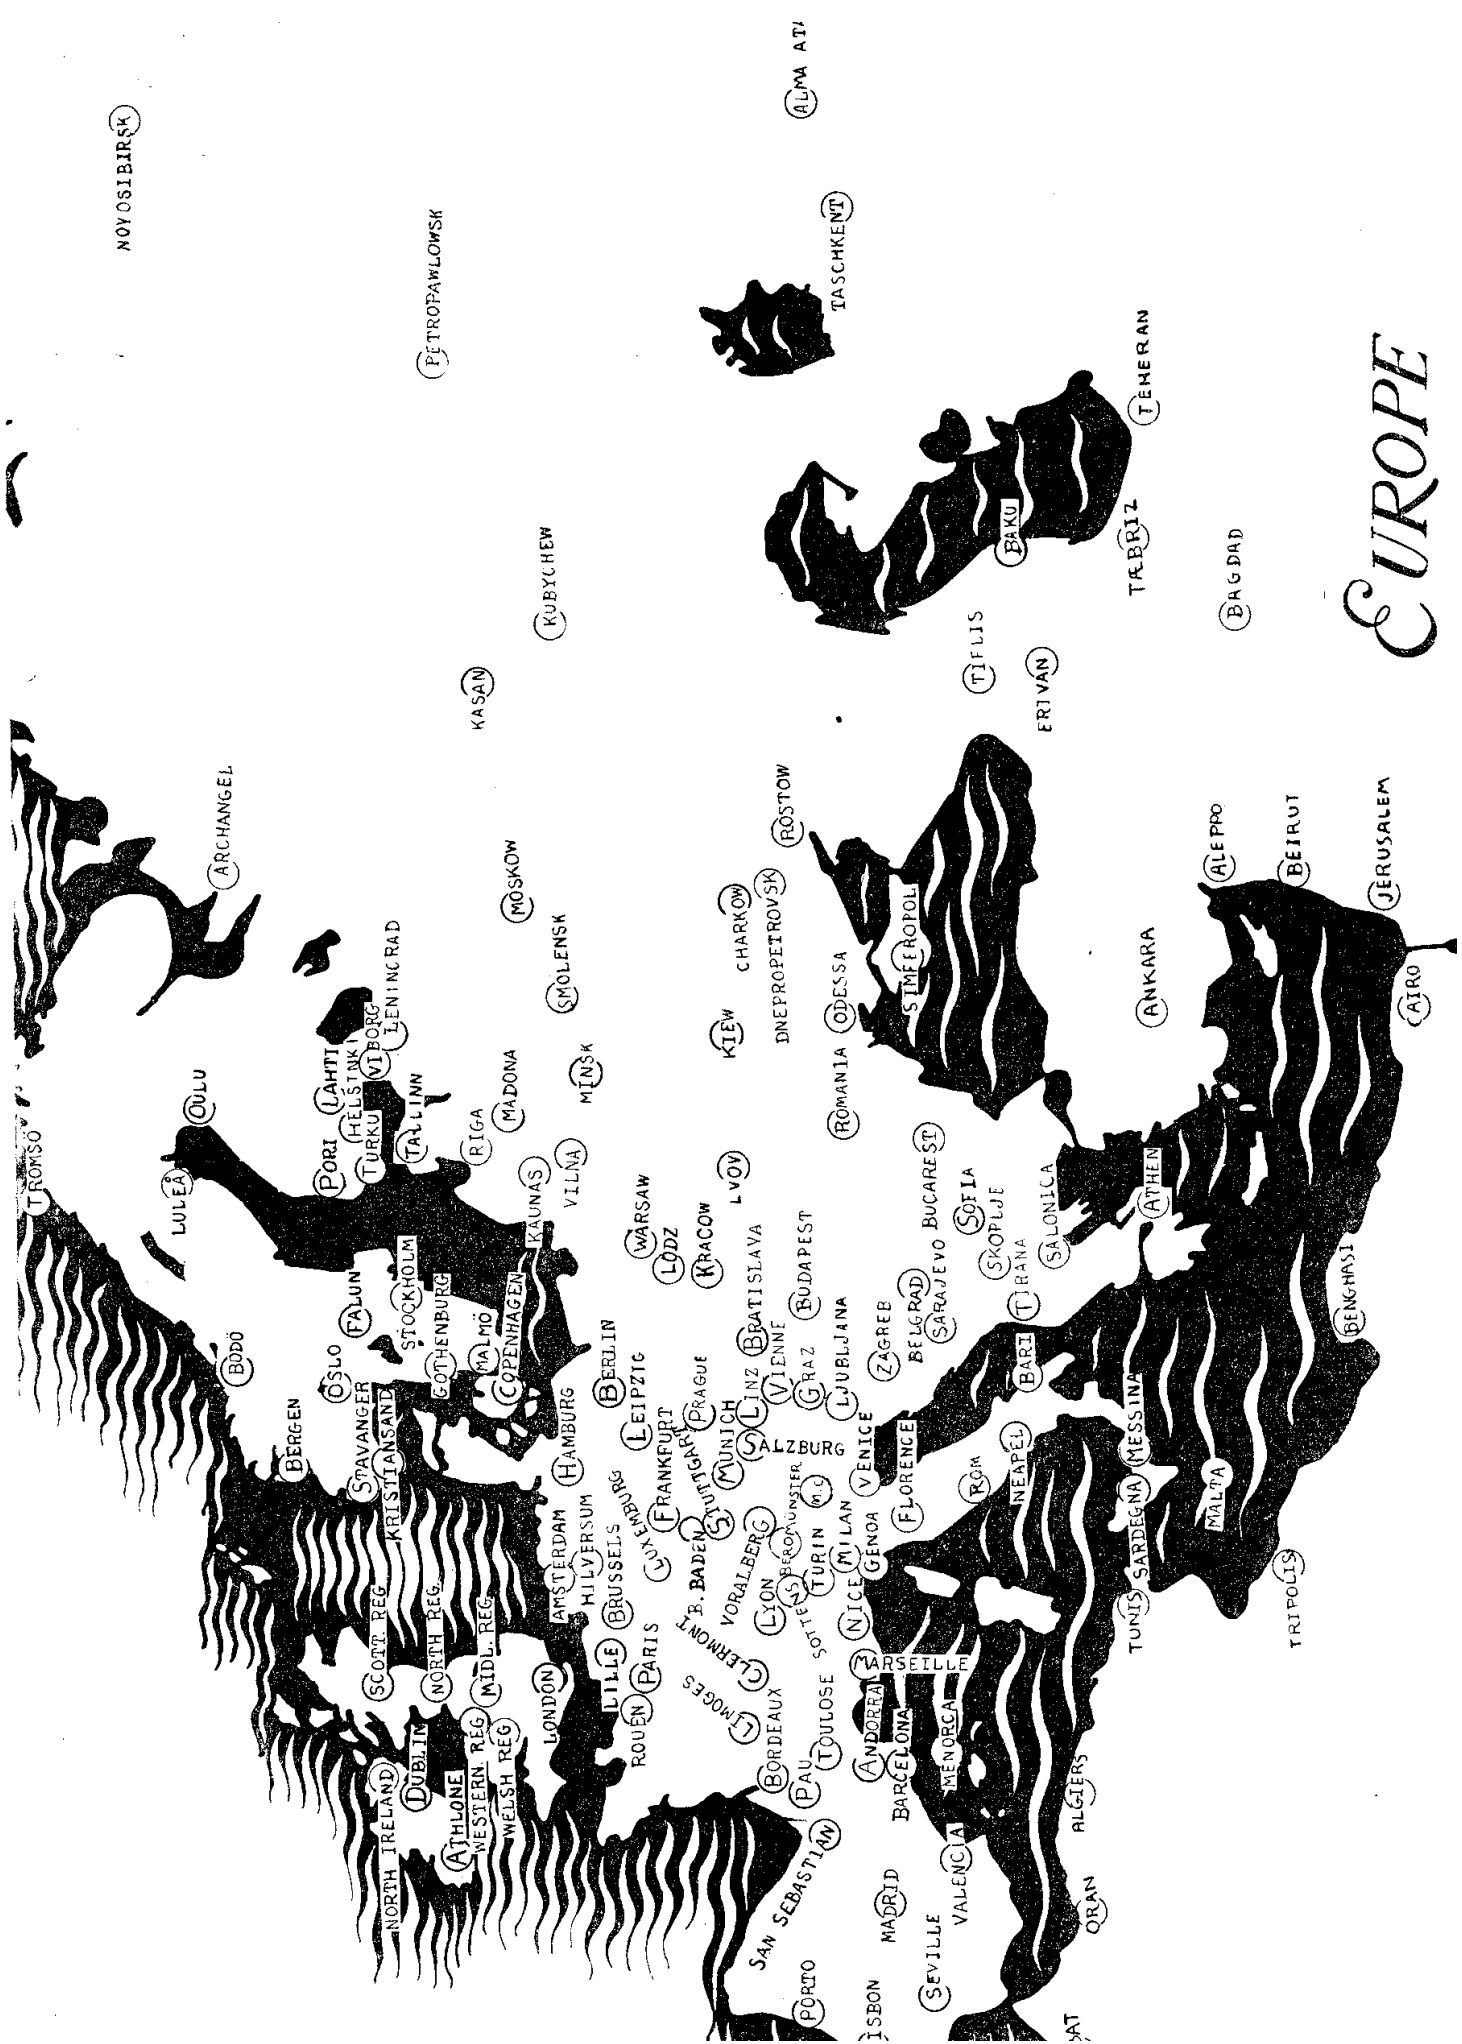

QSL Card.

As shown in the survey of the various broadcasting countries, many of the stations are interested in receiving reports from listeners concerning their broadcasts. Stations acknowledge these by sending listeners a QSL card or a letter. In the case of most stations it is stated if reports are answered by a QSL card.

Many shortwave listeners make a hobby of collecting these QSL cards. Such reports can in most cases be drafted in English, but to the South and Central American countries preferably in Spanish. The report should contain information concerning wave length, date, time, programme listened to, intelligibility, strength and whether there was any fading e. g. variable strengths (QSB), interference from another station (QRM) and static e. g. atmospheric interference (QRN). If it was an amateur station the report must contain the call letters of the station working. — Give details of your location, type of receiver and aerial. If postage is wanted enclose with the report an International Reply Coupon, obtainable at most post offices. *Greenwich Mean Time (G. M. T.) is employed in giving the time.* — The complete address for each station will be found under the various surveys of the countries broadcasting.

The following descriptions are used:

Intelligibility.	Strength.	Interference:
QRK1 — unintelligible	QSA1 — unreadable	QRM — interference from another station
QRK2 — partly unintelligible	QSA2 — weak	
QRK3 — intelligible with difficulty	QSA3 — fairly good	QRN — atmospheric interference (static)
QRK4 — quite intelligible	QSA4 — good	
QRK5 — easily intelligible	QSA5 — very good	QSB — variable strengths (fading)

(s) means *Daily exc. Sundays*

(ss) means *Daily exc. Saturdays and Sundays*

We have been asked very often why programs most popular with the listeners are not heard on a regular basis. Programs such as Bob Hope, Jack Benny, etc., are broadcast in the US from October to April or May. The shows aired through the winter in the US are recorded and sent to us, but there is a lapse of several months between the original date of the program and the time it is heard on AFN.

Announcement for Frankfurt, Bremen, Berlin, Munich and Stuttgart: "This is the American Forces Network serving American Forces in Germany".

Interval-Signal: Time pips every hour on the hour. Broadcasting commences and concludes with the U. S. National Anthem.

Message to Listeners: Reports are welcome and are answered with QSL cards.

RADIO BREMEN

Address: Schwachhauser Heerstrasse 363, Bremen.

Leading Personalities: Intendant: Mr. Walter Geerdes. Head of Information: Dr. Hans Arnold.

The "Happy Station" programmes, a special international feature of Radio Nederland Wereldomroep, are of 90 minutes duration. They consist of 1. Musical entertainment linked by polyglot announcements; 2. "Spotlight on Holland", featuring local colour news; 3. Musical interlude; 4. "Mailbag", answering listeners' mail by call to all parts of the world; 5. Musical sign off. Since 1927, with the exception of the war years, these programmes are produced and presented by Edward Startz.

All times are indicated in G.M.T.

Announcement: An old Dutch folk-song called: "In naam van Oranje". "Hier Radio Nederland via de kortegolfzender PCJ met onze dagelijkse uitzending bestemd voor alle land- en rijksgenoten buiten het vaderland. Goeden morgen, goeden middag en goeden avond Nederlanders, waar okk ter wereld" (Here Radio Netherlands via short wave transmitter PCJ, with our daily broadcast for all Dutch Nationals abroad. Good morning, good afternoon and good night Netherlands, wherever you are).

News in English: An old Dutch folk-song called: "Wie gaat mee overzee". "This is the international programme service of station PCJ Hilversum Holland, bringing you "News of the Netherlands".

Announcements in English and Korean.

"This is K.B.S., the Korean Broadcasting System" followed by the individual station announcers giving their own identification; example: "You are listening to HLKA in Seoul, Korea" given in both languages.

Interval-Signal: "3 TONED GONG"

Message to Listeners: "We are flooded by short-wave listeners' letters requesting QSL cards. Although we are strictly a long-wave network and do not attempt to attract any foreign listeners, we do answer all listener reports by letter and feel the world-wide publicity is beneficial. Foreign listeners do find our daily classical music programs very pleasing."

BROADCAST & COMMUNICATION EQUIPMENT

Newest Engineering Developments

PRODUCED BY OUTSTANDING AMERICAN ELECTRONIC MANUFACTURERS AND OFFERED BY THEIR EXPORT DEPARTMENT, STRICTLY AT FACTORY PRICES.

GATES – Broadcasting transmitters and studio equipment for AM-FM-TV-broadcast. Frequency and modulation monitors. Station and studio supplies, accessories and fittings.

STAINLESS – Vertical radiators and towers for AM-FM-TV-broadcast. Welded tubular, sectional. Withstand high wind velocity, corrosion resistant. Ease and low cost of erection.

WILCOX ELECTRIC – Complete communications installations. Transmitting, receiving and control equipment for airways and aircraft, industrial, police radio stations.

AMPEREX – Radio transmitting tubes. Long life, high efficiencies. No matter what your problem, you will find an Amperex tube to fill your needs and fill them well.

UTC – Complete line of transformers for broadcasting, Public Address, amateur transmitting, laboratory. Highest quality, uniform frequency response, low wave form distortion, high efficiency, thorough shielding, dependability.

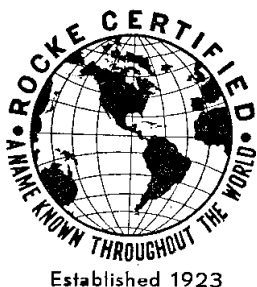

WEBSTER ELECTRIC – EKOTAPE, high-fidelity, magnetic tape recorder-reproducer for studio and remote pick-up use. Controlled by one knob, permitting instantaneous starts and stops of tape and accurate cueing or selection of desired sections.

RADIO-MUSIC – Para-Flux, Vertical, Lateral and Microgroove reproducers, unexcelled wherever the most realistic reproduction of transcription is necessary. Turntable chassis. Both widely used by broadcasting stations, AM and FM.

AUDIO DEVICES – „Audi discs“ - World-wide known professional recording discs, with all the features essential to high fidelity recording. „Audiotape“ - for magnetic tape recording.

CONSULT OUR ENGINEERS REGARDING YOUR PROBLEMS

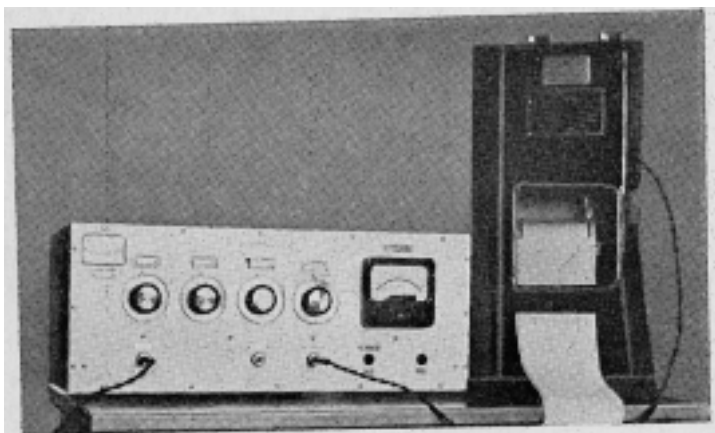

Broadcasting stations, engineers, are invited to write for complete information. Catalogs and technical data, prices, etc., will be sent immediately.

The **PROGRAMMETER**

The new Danish instrument which measures and registers programme appeal. The programmer is a purely electronic instrument and it works without applying directly to the listeners.

Constructed and manufactured only by

A/s ELTRA, 3-9, Maelkevej - Copenhagen F - Denmark

Walchris

High Quality Magnetic Pickups

Light weight pick-up, type „Fulltone“, for interchangeable needle or sapphire stylus; 20-12000 c/s $\pm 2\frac{1}{2}$ db; impedance 13 k Ω with average direct output 1200 millivolts (no transformer being used); armature damping adjustable from the outside; other impedances on request.

These revolutionary developments are exclusive to Walchris.

We also manufacture

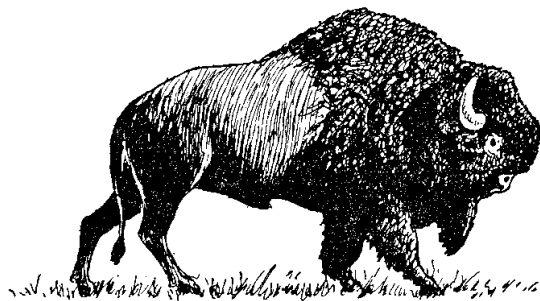

- Pick-up heads for portables
- Popular record player pick-ups, type 3-PM
- Pick-up rests, etc.

Please request our sales dept. for any further information

THE WALCHRIS WORKS

CANADA AND THE UNITED STATES OF AMERICA

"Radio Forum", a weekly broadcast of the "Voice of America", informally discusses recent happenings on the American scene or in international affairs. Under the able direction of Ben Wilbur, Chairman of the program (extreme right), Anne O'Hare McCormick, editorial columnist for the New York Times discusses results of ECA (Economic Cooperation Administration) on the occasion of its first anniversary. Mr. Ben Wilbur is representative in U. S. A. for the World Radio Handbook.

Editor Henning Sørensen (extreme left) controls the Danish broadcast from Montreal. At the microphone Mr. Ole Clausen, Miss Inger Bentzen and Miss Lis Fabricius Hansen.

CANADA

Population: 12,000,000 — **Listeners:** c. 2,000,000

UNITED STATES OF AMERICA**THE "VOICE OF AMERICA"**

is operated by the International Broadcasting Division of the Department of State to promote the better understanding of the United States among the peoples of the world and strengthen cooperative international relations.

Government-owned and controlled short wave relay broadcast operations are located in Honolulu and Munich, and short wave and medium wave stations at Manila. Short wave and medium wave relay facilities are also leased from BBC in England.

Other relays are in effect through arrangement with domestic broadcasters of other countries, such as France, Italy, China, Korea, Greece, Austria and Germany. Programs are written, produced and broadcast from studios in New York City and Washington, D. C.

LEADING PERSONALITIES:

Chief, International Broadcasting Division: M. Floy D. Kohler. — Associate Chief for Operations: James F. Thompson — Chief, Washington Office: Morton Glatzer — Chief, Program Operations Branch: Mucio Delgado — Chief, Facilities Branch: George Herrick. — Chief, Program Evaluation Branch: Leo Lowenthal.

Addresses: The International Broadcasting Division is centralised in New York and has one address only. "Voice of America", International Broadcasting Division, Department of State, 224 W. 57th Street, New York 19, N. Y.

STATIONS

U. S. A.s shortwave stations are divided into two main groups: East Coast stations, whose call-letters begin with W, and West Coast stations whose call-letters begin with K.

Highlights of Programmes:

"UNITED NATIONS TO-DAY", a quarter-hour review of significant international developments, highlighted by the recorded voices of delegates as they speak at United Nations' meetings around the world, is heard on more than 20 stations, which form a "Network for Peace" from Coast-to-Coast in the USA and the Dominion Network of the Canadian Broadcasting Corp.

A weekly quarter-hour programme "MEMO FROM LAKE SUCCESS", is broadcast in the United States over the CBS network and in Canada over the Trans-Canadian network on Saturdays from 01.15-01.30.

For full details of stations carrying these programmes, please write to United Nations Radio, Lake Success.

Announcement: "This is the United Nations calling the peoples of the World." This introductory phrase is used in all of the official UN programmes in all of the languages concerned.

Interval-Signal:

Message to Listeners: The Radio Division is anxious to establish contact with as many listeners as possible and will gladly acknowledge all communications. Letters from all parts of the world have already brought valuable information about the reception of United Nations' broadcasts and about local listening conditions. All correspondents will receive a United Nations Radio verification card, new correspondents being sent a copy of the Charter Basic Facts about the United Nations, and booklets about all the Specialized Agencies. — Correspondence, requests for copies of the schedule of U. N. broadcasts which can be heard in the United States, should be addressed to: *United Nations Radio, Lake Success, N. Y., U. S. A.* or to the Director of the nearest UN Information Centre. These centres are located in Buenos Aires, Cairo, Copenhagen, Geneva, London, Mexico, Moscow, New Delhi, Paris, Prague, Rio de Janeiro, Shanghai, Sydney, Warsaw and Washington.

ELECTRICAL MEASURING INSTRUMENTS

The Universal Instrument **TOVAMETER** is the only universal instrument possessing common linear graduation for direct current and alternating current.

This has been achieved by a device for which patent has been obtained and which in the highest degree facilitates the readings, prevents mistakes and renders superfluous special (coloured) marks.

It offers furthermore the advantage that all readings of alternating currents can be done right from zero.

29 measuring ranges for: Volt, mA, and Amp. $= \infty$ further for ohm, decibel and capacity. Demand our English lists for particulars. For further ranges separate shunts and transformers can be delivered.

SMALL PANEL TYPES

Diameters: 63-83 and 100 mm.

BIG PANEL TYPES

Diameters: 130-150 and 225 mm.

SMALL SQUARE TYPES

frame Dim.: 90 × 90 mm with Tubus Diam.: 65 mm.

BIG SQUARE TYPES

frame Dim.: 145 × 145 mm with Tubus Diam.: 132 mm.

PORTABLE LABORATORY TYPES

MEASURING-BRIDGES

In the interest of World Radio and a better understanding between all nations and peoples of the world we wish to get into touch with interested listeners in all countries who will act as correspondents for "The World Radio Handbook" and in that capacity work for the spreading of knowledge about it. Write to "World Radio Handbook", Lindorffallé 1, Hellerup, Denmark, for further particulars.

The journal for
radio enthusiasts &
technicians in all
parts of the world

WIRELESS WORLD is Britain's leading technical magazine in the general field of radio, television and electronics. Founded over 48 years ago, it has consistently provided a complete and accurate survey of the newest British technique in design and manufacture. Articles of a high standard cover every phase of the radio, television and electronics with reviews of equipment, broadcast receivers and components. Theoretical articles deal with design data and circuits for every application. *Published monthly 2s. Od. Annual Subscription £1.6s.*

Wireless World

TECHNICAL BOOKS ON RADIO TELEVISION & ELECTRONICS

FOUNDATIONS OF WIRELESS
 By M. G. Scroggie, B. Sc., M. I. E. E.
 358 pp. 4th. Ed. 7s. 6d. By post 7s. 10d.

"WIRELESS WORLD" GREAT CIRCLE PROJECTION MAP OF THE WORLD.
 2s. 6d. By post 3s.

RADIO CIRCUITS. — Step-by-Step Survey of Superhet Receivers.
 By W. E. Miller, M. A. (Cantab.),
 M. Brit. I. R. E. 62 pp. 2nd Edition.
 3s. 6d. By post 3s. 8d.

WIRELESS SERVICING MANUAL
 By W. T. Cocking, M. I. E. E. 328 pp.
 7th Edition. 10s. 6d. By post 10s. 10d.

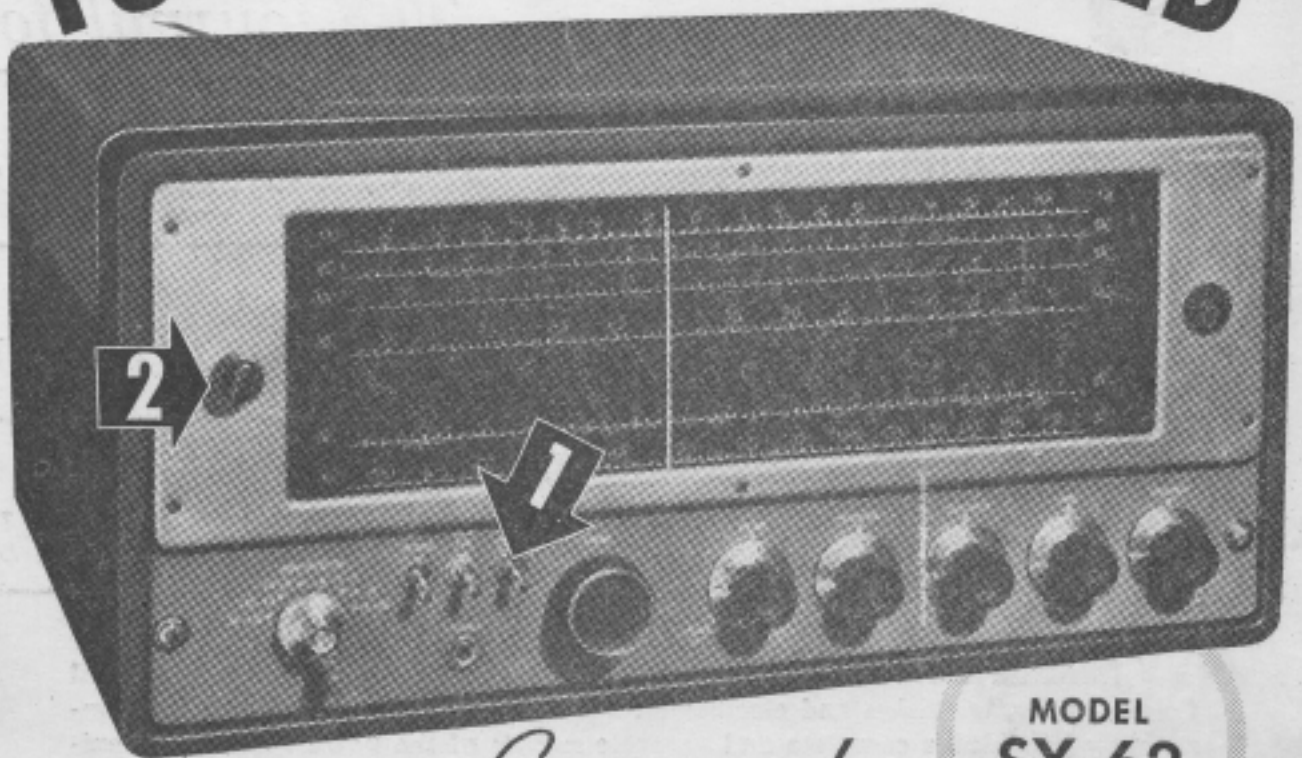

BASIC MATHEMATICS FOR RADIO STUDENTS. By F. M. Colebrook B. Sc., D. I. C., A. C. G. I. 300 pp. 2nd Edition.

ILIFFE & SONS LTD., DORSET HOUSE, STAMFORD STREET, LONDON S. E. 1.

Built to
TUNE IN THE WORLD

...IN **3 Easy STEPS!**

MODEL
SX-62

1 Flip on crystal CALIBRATION OSCILLATOR. Test signals will appear at 500 kc intervals on all DX Bands.

2 Use RESET CONTROL to adjust dial pointer to exact frequency of oscillator signal.

3 You're then "on frequency" with pin-point accuracy. If desired station is there to be heard, you'll bring it in!

The *Only Radio* with all these features:

- High-fidelity reception on all wave bands —Standard Broadcast, FM and Short Wave.
- World-wide frequency range, with continuous coverage from 540 kc through 110 Mc, AM or FM!
- Flexibility of control, with six degrees of selectivity, separate sensitivity and volume controls, plus automatic noise limiter and beat frequency oscillator.
- Ease of tuning with hair-line accuracy. Six broad scales with over 150 stations marked; calibration oscillator for checking frequency as explained above.
